Letter of recommendation

Nawaf worked at Rohde & Schwarz as an intern, from 4 July 2018 to 4 January 2019. He worked in our test team with half a dozen testers, to support our Singapore / German software development team with a dozen developers.

During his internship, he far overachieved his tasks. He showed great strength to conduct tests outside of the test documents. Additionally to his test duties, he was strongly committed in his work and helped our team to enhance features in a test tool used by our test team and developers.

I appreciated his way to challenge me as the senior architect, always asking why is it done like this. He expressed many doubts of the way we do it, together with firm conviction that he can find a better solution. I believe this is key to improve product and quality on the long run.

Nawaf is open-minded and showed good teamwork. I believe he will be an asset to your team. Unfortunately, he does not plan to join our workforce in Singapore. I wish him all the best in his studies and future career. Now the opportunity to engage him is yours.

Best Regards,
